This act is designed to protect the privacy of a student's educational records and the right of a student to his/her records. Compass Requirements

TLU's general education curriculum is called Compass. Compass has 3 parts: foundation courses, distribution courses, and competencies (and associated skills). Below are the requirements for each of the three areas.

The Foundations (18 hours)

- Basic Quantitative Literacy: MATH 130 or higher
- Critical Reading: FREX134
- Engaging Faith Traditions: THEO133
- Modern Language: Any modern language at the 131 level or higher
- Written Communication: COMP131 & COMP132

The Distributions (30 hours)

- Arts
6 hours from the following: ARTS130, DRAM, MUSI, VART
- Humanities & Culture
12 hours from the following: HUMA130, AFAM, COMM, ENGL, HIST, MAST, Modern Languages, PHIL, THEO, WOST
No more than 2 courses from any single discipline or from the modern languages can count toward this requirement.
- Natural Sciences & Math
6 hours from the following: NSCI 140, BIOL, CHEM, CSCI, ENVS, MATH, PHYS, STAT
At least one course must be a natural science course taken with a lab.
- Social Sciences
6 hours from the following: SSCI130, CRCJ, ECON, GEOG, POLS, PSYC, SOCI

The Competencies

Through completion of the foundation and distribution courses listed above, and also through selected courses in their majors, students will be developing important competencies. Course offerings designed to meet each competency will be identified in the schedule of classes with a competency code attached to the course number. Students will be required to take courses with the following competencies:

- Critical Thinking (T): 3 courses
- Effective Communication (C): 2 courses
- Engaged Citizenship (Z): 3 courses
- Ethics (E): 1 course

Competencies are identified in the fourth component of the course number. For example, VART-136-01-C is an Art Appreciation course that meets the Effective Communication competency requirement. Some courses will not have a competency. For example, GEOG-331-01 is a Geography course that does not satisfy a competency requirement.

Reflective Modules

Reflective modules are co-curricular explorations that are designed to help students develop their skills as lifelong learners in structured learning environments outside of traditional classroom settings. Various foundational capacities and core competencies will be developed during these intensive experiences. These reflective modules set the foundation for students' understanding of the ways that what they learn in their education will be connected with all the experiences of their lives. Ideally, these reflective modules support student reflection on their development in curricular and co-curricular experiences. Module requirements are:

- New TLU students who are required to take FREX must complete 3 modules.
- New TLU students who are not required to take FREX must complete 2 modules.

Additional module information:

- Students who take FREX must complete the Paw Print module.
- Students who transfer to TLU as core complete are exempt from the module requirement.
- Students who transfer to TLU with 75 or more hours are exempt from the module requirement.
- Preferably, the majority of reflective modules are completed by the end of the sophomore year.
- Students can register for a maximum of two modules per semester.
- Modules are assessed as Credit/No Credit.
- Modules may not be repeated even if the grade of No Credit is received.
- Students can take more than three modules if they wish.

This module is for students who are interested in exploring race, identity and STEM (Science, Technology, Engineering, and Mathematics). We will explore the ways racial/ethnic and STEM identities are constructed and we will examine the ways that these identities can inform and empower students to have successful careers in STEM fields, even when they are in a group that may be currently underrepresented in those fields. In addition, we will learn about the importance contributions of many African American and Hispanic/Latinx scientists and mathematicians to STEM fields.

All meeting times are required.

Crochet for Compassion

R. Bisha

Learn to crochet while also supporting an organization's compassionate mission by making an item such as a beanie for a newborn or person in cancer treatment, a prayer shawl for a domestic violence survivor, a wildlife rescue nest, a scarf for a child in the foster system, among others. Students will receive all supplies and instruction to master the basics of the craft needed to complete simple projects. Students will also receive support to send the completed item to the chosen organization. In addition to serving an important purpose, students have the opportunity to create in community with others crocheters. This module is suitable for students who have no experience with yarn crafts or those who have already developed expertise in the craft.

All face to face meeting times are required. Students must complete the assigned crochet project to donate to receive credit.

Informal Science Communication – Across Cultural Intersections

T. Sauncy

The module is for STEM students who ever considered TEACHING at any level as a career and is part of the TLU TOP DOGS STEM TEACHERS program. This fun and informal module allows you to give your SCIENCE TEACHING skills a test drive through presentation of a simple informal science lesson. Students can think about this module as a "try it out" opportunity to present content in an informal, low stress setting, and bring the excitement and fun of science to all kinds of audiences. An added bonus is that we will focus on the importance of cultural context to make our science lessons most effective. Students will explore how to best connect with the intended recipient of the lesson and learn the secrets behind effectively presenting complicated science topics to a diverse audience in an informal setting. In exploring these ideas, students will think about the cultural barriers they bring and those that may exist due to the background, culture, life experience or educational level of the audience. Students will learn about effective techniques used to engage diverse audiences in the interesting and fun ideas of science and how to most effectively communicate topics in STEM to the general public. The focus will be on demonstrations, simulations, hands-on experiences, and visual communication as a means of making intimidating STEM topics accessible to a wide range of age groups and educational levels.

All meeting times are required.
